

Humic Acid 12%

Concentrated Humic Acid Derived From
North Dakota Leonardite Shale

NON-PLANT FOOD INGREDIENTS

Humic Acid 12.0%

DIRECTIONS FOR USE

SOIL APPLIED: Apply 4-8 quarts per acre before or after a major fertilization. Apply 2-4 quarts per acre as needed through the crop cycle.

AS AN ADDITIVE TO LIQUID FERTILIZER: Add 1-2 percent by volume to the nutrient solution to activate nutrients, provide organic matter and remediate salt problems. This product may be used in fertilizers for injection into drip or low volume irrigation systems. Do not mix with solutions that contain ammonium sulfate or phosphoric acid.

FOLIAR APPLICATIONS: As a nutrient activator. apply 1-4 pints per acre in sufficient water to assure thorough coverage.

AS A HERBICIDE ADJUVANT: To increase the activity of and to improve the rainfastness of many translocated herbicides, add 1 pint per treated acre to the spray solution.

Manufactured By:
Glades Formulating Corp. (F-1811)
PO Box 1690
Belle Glade, FL 33430

Humic Acid 12% is a high quality soluble Humic Acid derived from North Dakota Leonardite Shale for applications where enhanced root growth and nutrient activation is required. This product will aid in the uptake and activation of nutrients applied, provide organic matter, improve cationic exchange capacity, aid moisture retention, and aid in the remediation of salt problems.

CAUTION

Keep Out of Reach of Children
